

Tools in Motion

Works from The Hechinger Collection

Tools in Motion is an extraordinary selection of artworks celebrating repetition and motion in common, everyday tools and hardware. This exhibition, chosen from *Tools As Art: The Hechinger Collection*, sparks the viewer's imagination and prompts a deeper engagement with each work's possible meaning, as the viewer reconsiders the ordinary as extraordinary.

With a witty and lighthearted subject matter and vivid colors and textures, the works of *Tools in Motion* have a special appeal to families, school groups and children. Their clever content and style proves thought-provoking for children, allowing them to explore new art and introducing them to important contemporary artists. For this reason, International Arts & Artists has created a fully developed educational program that accompanies the exhibition and is available for all hosting venues.

The artworks in *Tools in Motion* are diverse and range in material from wood, paper, metal, stone, neon, and video. Additionally, the exhibition features the work by Arman, Jim Dine, Jacob Lawrence, Claes Oldenburg, and many more, and addresses key themes of contemporary art and therefore is equally attractive to art lovers of all ages.
