China's sea changes

Karen Waga

"China’s sea changes" is more than a title, it is the de
scription of a new China. The country is now a world-class
workshop, a cultural institution, or a place of prodigies.

"Clearly, design can be put to a number of vertigo and terror
views. Bridge Dray, assistant curator at the South Asia Museum
in Pennsylvania, where an exhibition explores the ways in
which activity and reality were in full swing at 1000-year-old China.

"A Chinese Modern: Designing Popular Culture 1800-1937" at the
Museum of Fine Arts, Houston, features 120 historic and contempo
rary Chinese design objects, including porcelain, furniture, and
textiles. The exhibition is the first major exhibition of Chinese
design to be shown in the United States.

China's sea changes are seen in the way the country is now
being discovered by the world. It is no longer the "secret
china" to be hidden from the rest of the world, but a place
where innovation and creativity are flourishing.
